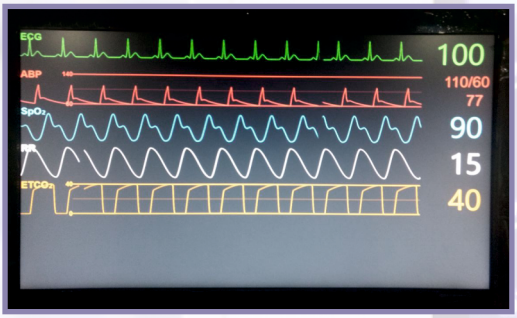
Anaesthesia Critical Care Emergency Medicine Simulation Course

ACE Simulation Course

23rd & 24th August 2019

LMMF's Deenanath Mangeshkar Hospital & Research Center
Department of Critical Care Medicine



- A 2 day simulation course focused on simulation training in specialities of Anaesthesia , Critical Care & Emergency Medicine.
- Eligibility : 2nd and 3rd year trainees from these specialities and consultants from any other relevant speciality.
- Useful for clinical practice as well as for exit exams.
- Certain basic knowledge of these specialities is prerequisite for attending this course.
- Pre-reading material provided summarizing the topics to be covered.
- Case simulation from all specialities on high fidelity manikin for better understanding of concepts.

Endorsements / Accreditations

(SEMI)

Society for Emergency Medicine India (SEMI

Indian Society of Anaesthesiologists (ISA)

(Maharashtra State Chapter)

ACE Simulation Course

Department of Critical Care and Emergency Medicine

ACE Simulation Course

HIGHLIGHTS

- Use of ventilator graphics for interpretation, diagnosis and treatment. Introducing NIV and HFNP.
- Disease specific ventilator settings, graphics and trouble shooting.
- Introducing Novel techniques in ventilation.
- Interpretation of arterial waveforms, EtCo2, ABG and other relevant hemodynamic parameters.
- Introducing IABP and Pacing.
- Hands on skills including intubation techniques & use of airway adjuncts, BLS + ACLS and a strong focus on Ultrasound.
- Less didactic lectures and more hands on teaching in small groups.
- "Putting it all together" session - case based integration of ventilatory and hemodynamic parameters.

Fees : Rs 4000/- Per Delegate

Applied for accreditation from MMC & NBE
